

## Driveway Paving Process

Each driveway block will require **more than three days** to complete. Active construction hours will be **7:00 AM to 5:00 PM daily**.

### Day 1 - Excavation

- Existing pavement will be removed.
- Residents may use their driveway again after 5:00 PM once excavation work is completed.
- **Vehicles must be removed from the driveway before 7:00 AM on Day 2 to allow paving work to begin.**

### Day 2 – Paving

- New asphalt will be installed.
- Once paving begins, the driveway will be **completely off-limits** to all vehicles and foot traffic.

### Day 3 – Curing Period

- No vehicles may be parked on or driven over the newly paved driveway.
- The driveway must remain clear for the entire day to allow the asphalt to properly cure.

### Day 4

- Driveway access will be restored beginning at **8:00 AM**.

## Important Notes

- The schedule is subject to change due to weather conditions or other unforeseen circumstances.
- Residents will be notified promptly of any schedule changes.
- **Any driveway with a vehicle remaining on it on the scheduled work day will be skipped and may not be paved as scheduled.**
- Once paving is completed on a street, **"No Vehicle Entry" signs** will be posted until the roadway or driveway is reopened for use.
